Bears Ears Sticker back outlines 4x2.pdf

FYI - this is what I presented to Marla to let us know if USFS wanted to be on the sticker/revise the text. Still waiting to hear back.

BLM's National Conservation Lands represent some of the West's most spectacular landscapes. These areas are diverse--made up of about 36 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert. Bears Ears National Monument was designated on December 28, 2016 under the Antiquities Act, which grants the President authority to designate national monuments to protect "objects of historic or scientific interest." Since 1906, Presidents and Congress have designated more than 122 national monuments, 27 of which include lands managed by the BLM. Bears Ears National Monument is collaboratively managed by the BLM and the Forest Service.
